

SOL BOARDS

Our team is building a unique and strong Solana community. We've noticed that there are a lot of NFT projects out there, but none of them want to think long-term and build community. *Sol Boards* aims to build a long-term community with good vibes. If we can sell all pieces of the *Sol Boards* collection, holders will be able to participate in the governance of the project via a decentralized autonomous organization (DAO), where they will be able to exercise voting rights on key decisions of the *Sol Boards* ecosystem. As members of the DAO, they will be able to participate in our future projects and automatically get a white list spot for their trust. After the mint, we will immediately announce our new project.

WHITEPAPER

WHY OUR PROJECT?

- It's a very good starting project for NFT rookies and also for experience lads
- By the way with buying Sol Boards NFT's you can support high school students who can't afford to go to university
- If all NFT's will be minted we will give away the 5% of the whole found away for charity (The dao will decide where the money will go) - In the following projects, this number will be even higher
- Investing in NFT's is a very new thing and that is the future. This is an extremely profitable investment for both the short and long term
- We are diligent and enthusiastic and able to evolve and move forward in this rapidly changing world. We want to do similar projects in the future. We will not forget about our initial supporters
- Summer is coming and what a cool thing it is to tune in to summer with a surfboard nft

COLLECTION

Our collection consists of **111** uniquely generated NFTs on the Solana blockchain. *(Some boards will be minted by the team initially for giveaways, promotions, and marketing activities. The exact quantity will be decided by the discord community.)*

WHITEPAPER

TOKEN

In order to develop our ecosystem and bring more value to our investors, we want to create a fungible token (*If all NFT's will be minted*). A proportion of this token will be dropped to our holders and made available to the open market for speculation. The token will be created after the mint, and the supply, tokenomics, and the ticker will be decided by the DAO.

TEAM

- **Phantom:** „Hi, I'm one of the two developers of this project. I'm a 17 years old high school student. I am studying maths for an increased number of hours. I'm learning coding in my free time. My future goal is to go to a strong university and become a software developer. I'm responsible for this website and the candy machine website." (DEVELOPER, PROJECT MANAGER)
- **Omen:** „Hello, I'm 18 years old high school student, who is studying maths for an increased number of hours. I've been interested in cryptocurrencies, for a while, and now I want to try myself in the NFT world. I would use a part of the funds to cover the university fees. In the future, we are planning to launch more NFT projects."
(ARTIST, COMMUNITY MANAGER, BUSINESS ANALYST)
